Conference Participation Application bylaws

( As approved by AOU Council Meeting # 49 : March 25, 2015)
“Academic Conferences Attendance Bylaws”

Introduction

The functions of the higher education may be summed up in three points: Teaching, Academic Research, and Community Service. Academic Research is important as it serves teaching through developing its methods and standardizing its practices on one hand. On the other hand, it serves the community through exploring its problems and anticipating its expectations. This exercise would lead to formulating proposals that result in improving practices, and enhancement of the community’s social, cultural and academic standards.

Thus, with the aim of developing its teaching staff potentials and skills, which would improve the quality of their performance, the Arab Open University stresses their participation and contribution in high standard institutional academic conferences and seminars sponsored and organized by well-known regional and international universities as well as by research centres and scholarly associations that have specialized academic nature.
